

## Jumpstart Exhibits at SPE Hydraulic Fracturing Technology Conference

(The Woodlands, Texas – January 19-21, 2009) **Jumpstart Energy Services, LLC** (Houston, TX) exhibited at the SPE Hydraulic Fracturing Technology Conference 2009 held in The Woodlands, TX. Jumpstart had John Gray, President, and Allan Hartman, VP Business Development, attending. Ron Herzfeld, President – Property Development Group (Austin, TX), also attended and assisted. Jumpstart previously completed an enzyme fluid non-gel hydraulic frac job with Property Development Group, and was presenting this concept to operators and service companies as a way to improve overall treatment productivity.

“This was a good opportunity for Jumpstart to meet oilfield operators and service companies to discuss ideas regarding non-gel hydraulic frac jobs with staged addition of enzyme fluid to increase mobility of oil in the fractures thru improved wettability and some reduced viscosity.” (John Gray, President)

Ted Moon, Ph.D., and Allan Hartman.
