

## Jumpstart Exhibits at SPE Western Regional Meeting 2009

(San Jose, California – March 24-26, 2009) **Jumpstart Energy Services, LLC** (Houston, TX) exhibited at the SPE Western Regional Meeting 2009 held in San Jose, California. John Gray, Jumpstart's President, attended and was assisted by Paul Atkinson, Ph.D., a consultant (and relative) who recently retired from Halliburton. Jumpstart's stabilized enzyme fluids have shown good effect treating heavy oil wells in China and Venezuela. Case histories are posted at [www.jumpstartenergyservices.com](http://www.jumpstartenergyservices.com)

“This show was a good opportunity for Jumpstart to make connections with West Coast research communities working with heavy oil and heavy oil producers. Having Paul assist us was a big plus that included having many of his former colleagues with Unocal and Stanford visit Jumpstart's booth.” (John Gray, President)

Dr. Sam Serem and Paul Atkinson, Ph.D., former colleagues at Unocal enjoy visiting at Jumpstart's booth.
