

## Oil Well Candidates for Treatment with Tigerzyme®

Jumpstart Energy Services looks at a number of different factors in order to identify oil wells that may be suitable for treatment with Tigerzyme®. This form is designed to gather information that will aid in screening candidates. We recognize information is often incomplete regarding a particular well or lease. We also realize some requested information may not be relevant to all service agreements with operators or to a particular well or lease. The form is designed to capture basic information that will help us review candidates. Final selection is still no assurance of performance or actual results. Please complete the form to the best of your ability. Thanks!

### OPERATOR INFORMATION

Date:	Contact/Title:		
Company:		Operator #:	
Address:			
E-mail:	Phone:	Cell:	
Working interest (WI):		Net revenue interest (NRI):	

### WELL / LEASE LOCATION

State:	County:	Field:
Lease name:	Well name / #:	
Leased well location / directions:		

### WELL / LEASE DESCRIPTION

Formation / Geology:		
Type of well (single well, waterflood, cyclic steam, etc.):		
Number of producing wells:		Number of injection wells:
Formation Temp. (F °):	Drive mechanism:	Static fluid in well:
Well completion date:	Total completion depth (ft.):	Perforated area (ft.):
Porosity (%):	Pay-zone thickness (ft.):	Completed zones:
Permeability (md):	Tubing size:	Condition:
Casing depth (ft.):	Casing size:	Condition:
Initial oil production (bpd):	Initial water (bpd):	Water cut (%):
Current oil (bpd):	Current water (bpd):	Water cut (%):
Formation pressure (psi):	Total wax content:	Other:
Water injection capability/disposal:		
Well spacing (distance):		Neighboring wells (distance):

### OIL DESCRIPTION

Specific gravity:	API gravity:	Pour point (F °):
Type oil (sweet, sour, paraffinic, etc.):		
Crude oil discount (\$):	Route to market (trucking, etc.):	

**PRODUCTION HISTORY**

Previous owners/field development:	
Current production including rate, decline curve, operational/mechanical issues:	
Type of pumps:	Storage capacity:

**WELL / LEASE MAINTENANCE**

Mechanical issues including recent maintenance or re-work:
--

**OPPORTUNITY ASSESSMENT**

Major factors impacting oil production for this well or lease:
Additional considerations:

1303 Sherwood Forest, Suite C
